A little about me

I am a Programming Technician with an ambitious vision for the future. I consider myself a detailed, responsible and committed person in every project in which I am involved, always eager to learn and combine the willingness to adapt to the work environment that is necessary along with my skills to improve it. Information technology moves me to look to the future in an environment of constant change and new knowledge to acquire in order to give my best; that's my goal.

Gaspar Maximiliano Rambo.
